

Designing for Dissemination and Implementation (D4D&I) Learning Hub

VA

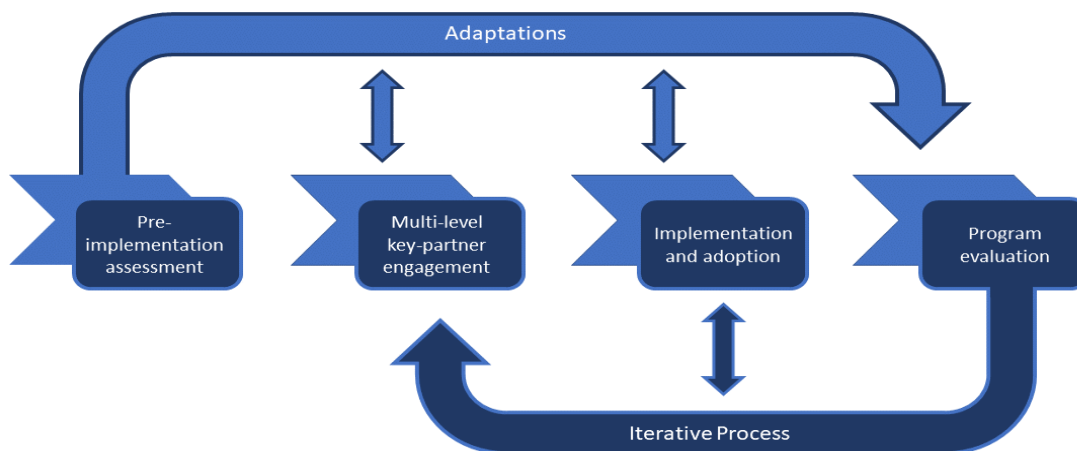

U.S. Department of Veterans Affairs
Veterans Health Administration
Quality Enhancement Research Initiative

What We Offer

The **Designing for Dissemination and Implementation (D4D&I) Learning Hub** was developed to promote research and quality improvement within the VA learning health system. This will be achieved by increasing the knowledge and skills of those who are interested in disseminating and implementing evidence-based programs across diverse clinical settings and Veteran populations.

Our multifaceted strategy combines methods that help participants consider the influence of multi-level contextual factors in diverse implementation settings. In turn, trainees will be able to design dissemination and implementation strategies to improve program acceptability and adaptability with these context factors to increase the widespread adoption, clinical effectiveness, and sustained population impact of care coordination programs.

The four discrete methods of D4D&I are:

Features

- Distance-learning technology
- Faculty mentoring throughout the 21-week program
- Peer-to-peer virtual learning collaborative (VLC) sessions
- Six, 2-hour didactic learning sessions with two virtual learning collaboratives over an 8-week period
 - Introduction to Learning Health Systems, Implementation Strategies and Frameworks

Designing for Dissemination and Implementation
QUERI Training Hub

VA Quality Enhancement Research Initiative
EVIDENCE INTO PRACTICE

- Communication Skills and Interviews
- Key Partner Engagement
- Pre-implementation Assessment
- Implementation and Local Adaptation
- Program Evaluation and Sustainment
- Final Presentation of D4D&I Care Coordination Project (Week 9)
- Monthly follow-up for 3 months

About Us

The D4D&I Learning Hub is funded by the VA Quality Enhancement Research Initiative (QUERI). D4D&I targets the adoption, implementation, sustainment, and scale-up and spread of an effective practice. We accomplish this through case studies/models pertaining to best practices in care coordination within the VA and between VA and community-based providers. Our faculty members are experts in Dissemination and Implementation models, methods, and measures that support implementation of evidence-based practice in real-world settings.

Who should take this training?

VA clinicians, staff and leaders, research investigators, early career awardees, and fellows who are ready to disseminate and implement an evidence-based programs.

Faculty

Cathy Battaglia, PhD, RN

Michaela McCarthy, PhD,
RN

Marina McCreight, MPH

Heidi Sjoberg, MSW,
LCSW, CDIS
